### ROCK-SOLID CONVENIENCE

Turn your tablet into a mobile monitor with the Universal Tablet Holder from GM Accessories. Second-row passengers can watch movies, listen to music, and play games, all without the need to hold the device in their laps. This can reduce spills in the back seat and make every trip more convenient and enjoyable for your passengers.

This durable accessory securely holds a single tablet against the front seatback in a choice of portrait or landscape orientations, attaching to the driver- or front-passenger-seat headrest posts.

No other tablet holder can guarantee you the quality of GM Accessories. The sturdy plastic and metal construction lives up to GM standards and will safely hold your tablet without fear of failing.

#### Size Capabilities

The holder extends up to 9.5" or retracts to just 4.5" to securely grab tablets of various sizes, including (but not limited to) the iPad Air 2, iPad mini 4, and iPad mini 2.

The large grip even allows the 12.9-inch iPad Pro to be compatible when placed in landscape orientation.
